Swan-a-rama
Aug-9 1977

Dear Harold W:

I am hoping you are getting better by this time. Possibly you may suffer from a Syndrome Type weakness, among other things, but there are ways to cope, tho' not always recognized by the ama etc. per se'.

Well, this is to tell you that my son Henry came by here Sun. to see me - he had on other trousers, I still think the ones in that fire, which to my mind could have been removed from a body or placed in there, the body soused with some chemicals and sees reacted as like in funeral homes (over plz)

cremation for instance, what I kept were items such as what appear to be bone bits, etc. The rest was washed away, picked up (shortly afterward) by the city sweeper. To me, I find parallels to the Nazi crimes of WWII?! Whoever was responsible was careless, or sure of their not being held guilty as yet, if an inspector were sincere, I believe.

I know you can read me, because you are a writer and publisher yourself.

I won't list what I consider to be evidence items, but for example in the ashes, dust, etc. was the metal which was had melted, silver-colored.

Or could they have used wire to open door? I don't know. (2)

Part of it to me, seemed to be from the wire that, loosely tied to the door on the drivers' side had probably been used binding a person to hold him seated erect. Had burnt and then possibly the horn commenced. after a few moments of that, when I looked out, shocked to see the flames inside the closed up vehicle, the scene was horrible.

Whether the person and I only can see that a person did "burn up" in there was dead or near dead I couldn't say, I know during the instants I was watching before running back into the house, scant yards away, the horn blowing seemed to

(over pls)

be broken as though there were no pressure on it, etc. The hood was up later, inside the engine encasement area there had been no burning.

I could see that though the flames were shooting out they outlined what appeared to be a human form - my imagination could only take over, but I knew that it could be like the other cases. Once I had seen one of the cars afterward when the fire dept. was through, and I said ~~something~~ someone may have been in the car. The fire dept man merely said "this may be a job for the police" a block away

Incidentally, I did see more of those tracks, looked like

barefooted or maybe part tennis shoe or rubber ~~sol~~ soled, like the track shoes, and bare ~~ft by~~ together, strangely. near the curb, near where the long rifle .22 bullet had been with the teeth marks on it — this 8-9-77 morning was the crepe rubber sole only of a shoe, ~~by~~

The foot marks - blackened as if by fire etc., looked as tho' there were a struggle there, the way the track marks were.

This was a block away, west side of Henderson and w. 7th. intersection.

Now, I'm afraid about my oldest son Mike (23 as of Aug 14) He had been in OKla-City. and his ~~VA~~ money was accumulating in Union State Bank which

(over pls)

"legally" took over his money.
Also, aside from many
other past situations, law
firms were since before June
threatening him over a DWI
etc. case. What I was thinking,
some of these might just do things
such as that "car burning",
for the money. Some of those,
I believed, to be clued in to
the JFK case, etc. also.
For instance, to me "Fred
Farias" or possibly "Fred Chase"
even sort of way-out on
~~Fred Carras~~ Carrasco (sp?)
re Huntsville, Texas, 1974.??
But he was closely
associated with my son as
was Hal Parker in Jourdanton
"little old man" Dealey Pl. 1963
and Owen Beyer (sp??) or

Fred apparently lives near my ex-wife now.

Dorothy Driver — re Zahler Group photos.

But the way things are looking at this "accident" pile — though the foreman said looked like had been set — reminds me of how Fred had once "thrown away" (just like the license plate to the old Blue Beret car) a traffic ticket off the car — same one I think I had seen that a.m. parked a blk. away from the police sta.

But Fred is lookalike in book "Coverup" by Shaw and Harris, Julian Bynedo. But moreso, he may look like Guy Gabaldin (pg. 164).

(over pls.)

Fred is married to a japanese woman.

But, about this car-burning, and looking back about the others, I find that since my oldest son seems to be missing, the "remains" that have been cast aside by police and even "covering up" in the newspapers, etc., could be him, but if not him (I pray) then, someone else.

Also, I can think of other cases where ~~the~~ this ~~snuffing~~ "snuffing out" system could have been used: the Jimmy Hoffa case; among many, the three missing girls (Arnold case) from the Seminary South shopping area, (Ft. W.)

(5)

on pg. 164:

Manuel García Gonzales — lookalike a "Doña" in "por of Queen Beyer" (Sp-?) who was associated with V.H. and in Waco, etc. and who was Mike's, my pors "guardian" etc. also as she says she controls "half of Mexicans" in area and her ex-husband owned "half or more of bars in Ft. Worth" making her an owner, a Robert is one of her "sons."

~~She, a Pole also~~

Emilio Santana also pg. 164, lookalike a James associated with "Fred." Fred is a "retired A.F. vet," and has his income-tax business (over)

a Jew also connected with Rodarte & Wolf Rd. "settlement"

He seems to tie in to this. But yet he seems nice, etc. Says Guerin, he's underworld.

Other ties are Western Hills motel, etc., drugs, and tie-in to Davis case.

Davis, as I wrote to you, probably ~~is~~ me could be man in photo pg. 163 of book FMG IV — center of photo.

Will write more later. Have a few days vacation left.

Please remember - The real underworld is never molested or if so, only temporarily, etc around here. Hoping to hear from you soon.

Best —
Charles S.
